

# HW

# WANDO HILLARY

SOFTWARE DEVELOPER | WEB & MOBILE DEVELOPER  
PROPERTIES: HILLARYWANDO.COM

## OBJECTIVE

To work in an esteemed institution that will enable the utilization of my personal and professional skills to achieve organizational growth and self-actualization.

## SKILLS

General Software Development: Java, C, C++, Lua

Web Development: HTML5, CSS3, ES6/7/8, Bootstrap, ReactJS, NodeJS, ExpressJS

Mobile Development: Native Android (Java + XML), Android Lifecycle Components (Room, LiveData), Retrofit, Sqlite.

## EXPERIENCE

### Full Stack Web App, Face Recognition App

<https://github.com/Wandonium/faceRecognitonBrain>

Built a web application that makes use of Artificial Intelligence to recognize faces from any image supplied to it via a url. The front-end was built with ReactJS, the back-end with NodeJS and ExpressJS while the database was implemented with PostgreSql

### RESTful Web API Consumption, Robot Friends

<https://github.com/Wandonium/roboFriends>

Built a web application that lets you interactively search among a number of robot friends. The app was meant to illustrate the consumption of the Open Source RESTful RoboHash web API into an interesting UI.
